

Notice of Trail Closure

In preparation for the construction of infrastructure, roads, and the stormwater management pond for Phase I of the Windermere Development, the trail that links the South Huron Recreational Centre to the main trail at the Ausable River will be closed for public safety. This section of trail is private property and is anticipated to be closed into the fall. Once construction work has completed, a new trail linking to the main trail will be available to the public that meanders around the top of the stormwater management pond.

In the interim, all other main trail access points along the Ausable River remain open (i.e., Wellington Street to Andrew Street and north to Hill Street). Informational signage is being prepared and will be installed at the trail closures shortly.

We thank you for your cooperation!

— Trail closed — Trail open

All other access points remain open
